

## **JOB VACANCY**

### **Electronics Assembly Operator**

QUICKCIRCUIT AUCKLAND

QuickCircuit has requirements for staff in the production area. The electronics assembly operator is responsible for the assembly of various electronics from component insertion, PTH soldering through to varying levels of testing and packing requirements.

#### **Preferred skills & attributes:**

- Experience in electronics manufacturing or a passion for technology.
- Some level of experience with hand soldering would be advantageous
- Excellent Interpersonal, verbal and written communication skills – good command of English
- Quick learner who has a very strong work ethic.
- Ability to adapt quickly to change and can work in a fast-paced environment.
- NZ citizenship or residency.

#### **Key Responsibilities, but are not limited to:**

- PTH component insertion, soldering, packing and product testing and other duties related to manufacturing.
- Logging units through the QC systems.
- Providing continuous feedback to production lines to assist in the improvement of product quality and throughput.
- Meeting throughput targets while ensuring QuickCircuit's high level of product quality is achieved.

#### **Other Responsibilities / requirements**

- Available for shift allocation based on company requirements.

For further information, please contact QuickCircuit HR.

If you think you have what it takes to add value to this position and grow with the company, please apply via e-mail to [gchr@quickcircuit.co.nz](mailto:gchr@quickcircuit.co.nz) with a covering letter and your CV as well as sending in our application form (Application form can be found on our website under the 'work for us' section, visit [www.quickcircuit.co.nz](http://www.quickcircuit.co.nz)).
